Knox Version

Time allowed - Two hours

FIVE questions only, ONE from Part I and FOUR from Part II. Credit will in all questions for short quotations, but only where these quotations Hatrate the enswer-

ONE only of the questions 1, 2 and 3. The question you choose must be dection you have studied.

- PROPHECY IN THE OLD TESTAMENT :

its an easay describing in detail Jersmiss' religious interpretation of events of his day and the political situation shich had led to them.

- THE LIFE AND TEACHING OF CHRIST

ou art not far from the Kingdom of God" - Write an essay explaining the insight which Jeaus praised when He said this and describing in detail the other teaching of Jesus about the Kingdom.

- THE LIFE OF THE EARLY CHURCH

Presching contains certain essential topics. Write an essay the straining these and explaining in detail why it met with opposition from Jews, from the Greeks and from the Komars.

TOOR questions from this Parts Answer the first and one other question of the two sections you have studied.

PROPRECT IN THE OLD TESTAMENT:

Question & and one other an enam section.

What caused Josiah to become kings -

Why did Josiah go egainst Pherson - mechoh, King of Egypt?

What Hulda's prophecy concerning the death or somian? Now did he die?

. How did Jeremiah and the leaders of the Jews in Babylon disagree? What was the outcome of the disagreement?

What was Shiloh? What happened to it? Why did Jeremiah recomment the people to visit it?

(f). Why did Jeremian not expect the people and rulers of Jeruselem] to change?

Why did the people of Jerusalem select Jehoshas king after the death of Josiah? What did Pharach - neshoh do?

What did Jeremiah mean when he said that the voice of the bridgroom and the bride should not be heard in Jerusalem any more?

What had Jeremieh said that seused Pashur to punish him?

dow did he punish him?

Why was Jeremiah thrown into the dungeon? Why was he taken out?

Teforms did Josiah carry out and why were they necessary?

did Jeremiah understand by the New Covenant and how would it

in three examples of Jeremiah's moted prophesies and explain such case the meaning conveyed.

Section B - THE LIFE AND TEACHING OF CHRIST

Answer question 8 and one other from this section.

How did the three wise sen know where to find Jesus?

(b) Why did the devil show Jesus all the kingdoms of the world? How did Jesus enswer the davil?

(0) Jesus asked his disciples: The do man say that I am? What answers did the disciples give? - What did Peter say; that the disciples thought themselves?

(d) When John the Baptist was preaching in the wilderness how did he compare himself with Jesus?

(e) At his entry into Jerusalem how did the people receive Jesus? Why did the chief priests and scribes not arrest him immediately?

(f) Name the three parables which illustrate how God treats sinners that repent. What attitude is common in all three?

(z) Of what did the Jews accuse Jesus before Pilate?

(h) Where did the Apostles go after the resurrection of Christ? Why did they go there?

(i) In ouring persons of leprosy what conditions did Jesus demand to be fulfilled by/the persons he sured? .

What boast did Peter make at the last supper? What did Jesus prophesy about him?

. How did Jesus try to warn his disciples about his death and resurrection?] Why were the disciples slow to understand? Explain from the part of the gospels you have studied how at last they understood.

"hat did Jesus tell the twelve spostles to do when he sent them out to preach? Which 3 apostles did Jesus sometimes choose to be his compenions? Name 5 occasions and describe one of them.

11 - Who were (a) the Herodians, (b) the Pharisees and (c) the Saducees?, Why did they oppose Jesus?

Section C - THE LIFE OF THE BARLY CHURCH

Answer question 12 and one other from this section.

(a) To whom was Peter's sermon eddressed on the day of Pentequat? What was their resetion to his eddress?

(b) Why were rever and John arrested after they had healed the lame man at the Beautiful Gate? What did the Sanhedrin order) them to dof

(c) Name the first two events in which we hear of Saul.

(d) At the end of his defence Stephen accused the Council of things. What were they?

(e) How was Saul received by the Christians when he wisited Jerusalem for the first time after his conversion?

(f) Why did Paul rebuke Bar-jesus, Elymas the sorcerer? What,

was the effect of the curse? (s) Why did the silversaiths bause Paul trouble? In which city?

(b) Why did Gallio the deputy of Achaia refuse to settle the dispute between Paul and the Jewa?

(i) Why did Felix keep Paul in prison?

(j) Why did Paul's ship suffer shipwreck on the way to Italy?

Churches were founded in the following places: (a) Antioch in Syria, (b) Cassarea, (c) Lystra and (d) Corinth. Indicate briefly the events which led to and the persons who were involved in the founding of each church.

[14. Mention 3 ways in which early Christians helped the poor and needy, and give instances illustrating your answer.

Describe briefly the main arguments at the Council of Jerusalem. How did the Council solve the questions? How were the decisions/ made known to the Churches?

Time allowed - Two hours.

Answer FIVE questions only, ONE from Part I and FOUR from Part II. Credit will be given in all questions for short quotations, but only where these. quotations illustrate the answer. .

PART I

Answer ONE only of the questions 1, 2 and 3. The question was about sust be from a section you have studied.

PROPHECY IN THE OLD TESTALENT Section A

1. Write an essay describing in detail Jeremiah's religious interpretation' of the events of his day and the political situation which had led to

Westion B - THE LIFE AND TEACHING OF CHRIST

"Thou art not far from the Kingdom" - Write an essay explaining the insight which Jesus praised whon He said this and describing in detail the other teaching of Jeans shout the Kinedon

Section C - THE LIFE OF THE EARLY CHURCH

Paul's presching contains certain escential topics. Write an essay outlining these and explaining in detail why it met with apposition from the Jews, from the Greeks and from the Romens.

shawer FOUR questions from this Part. Answer the first and one other question in each of the two sections you have studied.

Section A - PROPHECY IN THE OLD TESTAMENT

Answer question 4 and one other in this section.

- 4. (a) What caused Josiah to become king?
 - (b) Why did Josiah go against Pharach nechon, King of Egypt?
 - (c) What was Hulda's prophecy concerning the death of Jusiah? How did he die?
 - . (d) Now did Jaremiah and the leaders of the Jews in Babylon disagree? What was the outcome of the disagreement?
 - (a). What was Shiloh?' What happened to it? Why did Jeremiah recommend the people to visit it?
 - (f) Why did Jeremish not expect the people and rulers of Jerusalem
 - (2) Why did the people of Jerusaled select Jehoshas king after the death of Josiah? What did Pharach - nechoh do?
 - (h) What did Jeremiah mean when he said that the voice of the bridegroom and the bride should not be heard in Jerusalem any more:
 - (i) What had Jeremiah said that caused Pashur to punish him? How did he punish him?
 - (d) Why was Jeremiah thrown into the dungeon? Why was he taken out?
- What reforms did Josiah carry out and why were they necessary?
- 5. What, did Jeremiah understand by the New Covenant and how would it differ from the former governmt?
- Describe three examples of Jeremiah's acted prophesies and explain in each case the meaning conveyed.

Geotion D - THE LIFE AND TRACHING OF CHRIST

Answer question 8 and one other from this section.

- (a). How did the three wise men know where to find Jesus?
 - (b) Why did the devil show Jesus all the kingdoms of the world? How did Jesus enswer the devil?
 - (c) Jesus asked his disciples: Whom do men say that I am? -What answers did the disciples give? - What did Peter say that the disciples thought themselves?
 - (d) When John the Baptist was preaching in the wilderness how did he compare himself with Jesus?
 - (a) At his entry into Jerusalem how did the people receive Jusus? Why did the chief priests and scribes not arrest him immediately?
 - (T) Name the three parables which illustrate how God treats sinners that repent. What attitude is common in all three?
 - (g) Of what did the Jews socuse Jesus before Pilate?
 - (h) Where did the Apostles go after the resurrection of Christ? Why did they go there?
 - (1) In curing persons of leprosy what conditions did Jesus demand to be fulfilled by the persons he cured?
 - (j) What boast did Peter make at the last support What did Jesus prophesy about him?
- How did Jesus try to warm his disciples about his death and resurrection? Why were the disciples slow to understand? Explain from the part of the gospels you have studied how at last they understood,
- What did Jesus tell the twelve apostles to do when he sent them out? to presch? Which 3 apostles did Jesus sometimes choose to be his . bemparions? Name 3 occasions and describe one of them, ...
- 11. Who were (a) the Merodians, (b) the Pharisses and (c) she Saducees? Why did they oppose Jesus?

Section C - THE LIFE OF THE EARLY CHURCH.

| Answer question 12 and one other from this section.

- 12. (a) To whom was Peter's aermon addressed on the day of Pentecost?) What was their reaction to his address?
 - (b) Why were Peter and John arrested after they had healed the lame man at the Beautiful Cate? What did the Sanhedrin order them to do?
 - (c) Name the first two events in which we hear of Saul.
 - At the end of his defence Stephen socused the Council of 5 things. What were they?
 - How was Saul received by the Christians when he wisited! Jerusalem for the first time after his conversion?
 - (f) Why did Paul rebuke Bar-jesus, Elymas the sorcerer? What was] the effect of the ourse?
 - (g) Why did the silversmiths cause Paul trouble? In which city?
 - (h) "Why did Gallio the deputy of Achain refuse to settle the dispute * between Raul and the Jews?

involved in the founding of each church.

- (i) Why did Felix keep Paul in prison? (i) Thy did Paul's ship suffer shipwreck on the way to Italy?
- Churches were founded in the following places: (m) Antioch in Syria, (b) Caesarea, (c) Lystra and (d) Corinth. Indicate briefly the events which led to and the persons who were
- Mention 3 ways in which early Christians helped the poor and needy, Yand give instances illustrating your answer.
- Rescribe briefly the main arguments at the Council of Jerusalem, how did the Council solve the questions? / How were the decisions made known to the Churches?

Arewer FIVE questions, choosing not more than 750 from any one section

WAH KIU YAT PO

SECTION A

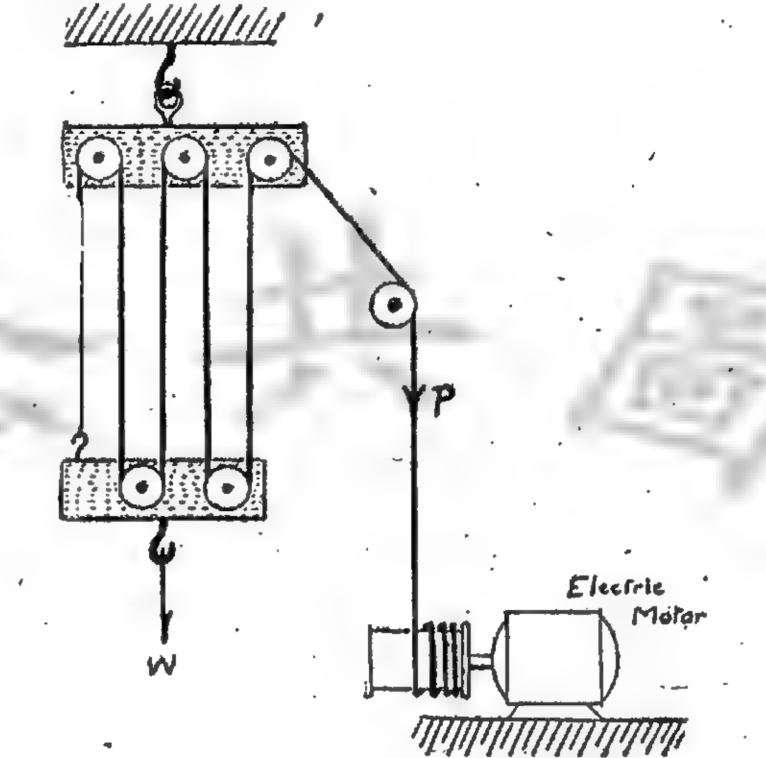

1. (a) State Archimedes Frinciple

(b) Describe, with the sid of diagrams, an experiment to verify it.
(c) The rectangular rod shown in the four diagrams below is 12 cm. long and the area. of its end is 2 on2

Calculate (1) its weight. (ii) the density of liquid A. (iii) the force in the inread holding the rod submerged in liquid A. (iv) If a 10 gm, wt, is strached to the bottom of the rou as shown in the fourth diagram, and the rod again placed in liquid &. will the rod sink or float? Give / reasons for your answer.

- (a) Define the terms "Work", "Power", and Milisionay" when applied to a saching.
- (b) The rachine shown below is powered by an electric notor which will raise any luad "N" at a steady speed of 2ft/8sc. When the load "W" is 200 lbs. wt. the force P is found to be 55 lbs, wt.

Calculate: (i) the Velocity ratio. (ii) the work dors on the load in one minute.

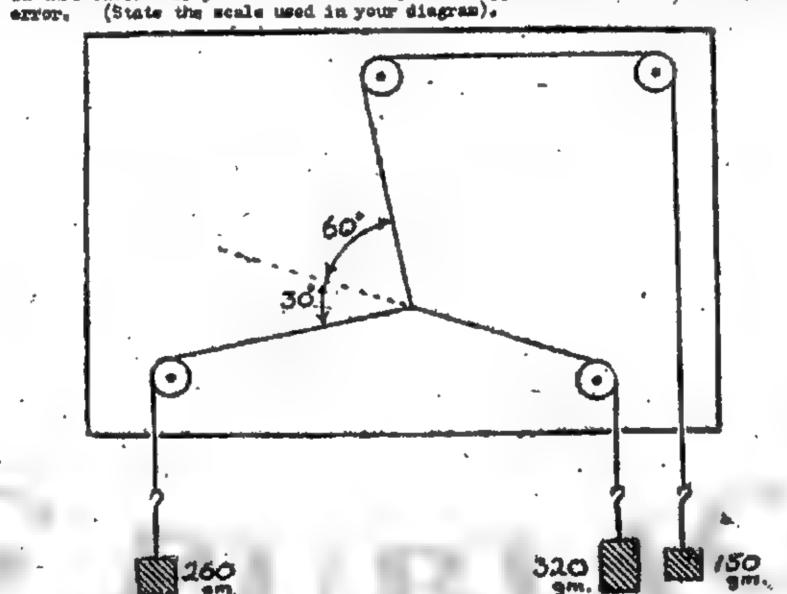

(iii) the power of the motor, in H.P. (iv) the power wasted, in H.P. (a) It was found with other loads that P and W were related as follows:

> P(1bs. wt.) | 19 | 55 | 100 W(lbs, wt.) 20 200 425

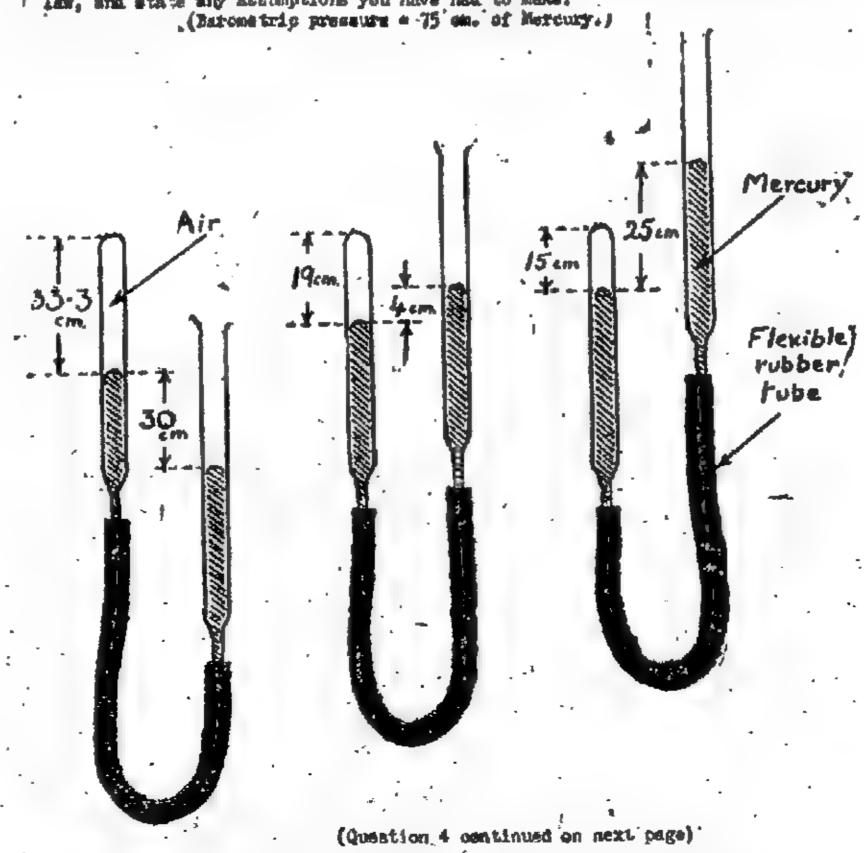

Calculate the efficiency in much case, and explain way the ellicioncy pecomes greater for the larger load.

3. (a) State the "Triangle of Forces" theorem.

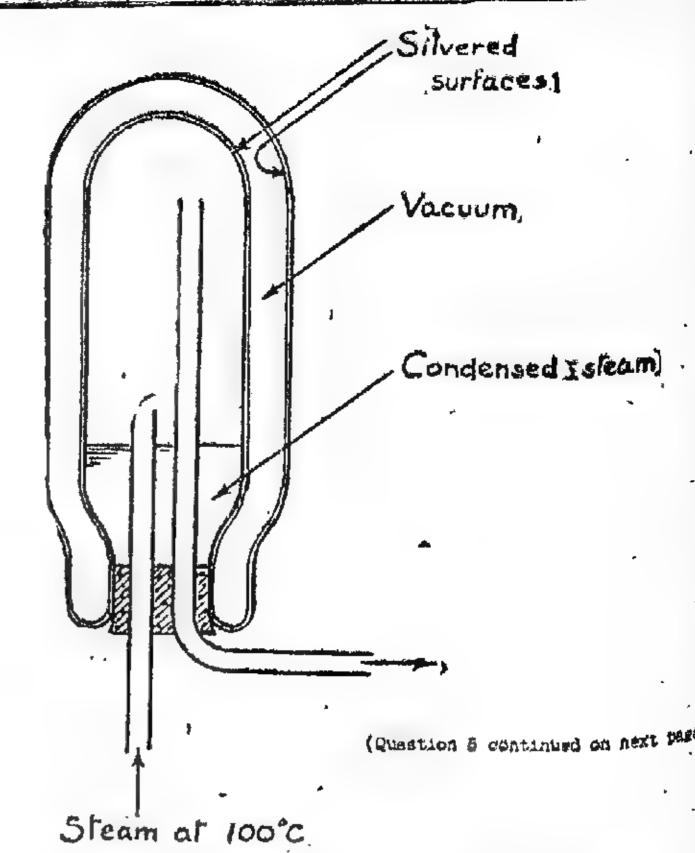

b) The apparatus shows strings passing over pulleys fixed to the front of a vertice? drawing hours; Acourately construct a triangle of forces for the weights and anglet given in the diagram, and state whether the triangle law is verified or not in this case. If your answer is "No", then suggest a reason for the experimental

- (c) (i) A tapered woodeh rod A.B. weight 2 lbs. and is 30 ins. long. . It between on a fulcrum 20 ins. from A. the fulcrum is now moved to a point 10 ins. from A. Find where a 5 1b. et. mist now be hung to balance the rod (11) Keeping the 51b, wt. fixed, an additional 5 lb. wt. is hung at B. Find the
- mer position of the fulcrum, for the rod to balance, '4. (a) State and name the gas laws which are time for a fixed mass of gas
- (1) at constant temperature only. (14) at constant pressure only
 - (b) The diagrams below show three sets of restings taken with a piece of apperatum. Use these readings to see if the air englosed in the left hand tube obeys Royle's les, and state any assumptions you have had to make.

- 4. (c) A heavy glass tube 14 ins. long, closed at one end is lowered vertically into the son with 1th open end downward. . After reaching a great depth it is raised serin. and it is found that the water has wetted the tube to a height of 12% ins. from the open end. How deep was it lowered? . Adsume that the temperature of the air in the tube was 17°C at the sunface of the sea, and 7 C at full depth of immersion. Passme also that the atmospheric] pressure was equivalent to a height of 50 ft., of sea water.,
- (5, (a) Define the terms "Calorie" and latent heat of fusion".
- (b) Describe a laboratory experiment to measure the latent heat of fusion of ice, and l show how the latent heat is calculated from the measurements you take.
- (c) In three separate experiments, a steady stream of steam at 100°C to passed through the communities drawn, until no further condensation takes place inside the flask. The water collected is then weighed.

through the "empty" flack, originally at 20 % / Calculate the thermal capacity of the flack. (Latent heat of vaporisation of water = 540 cal./(51.)

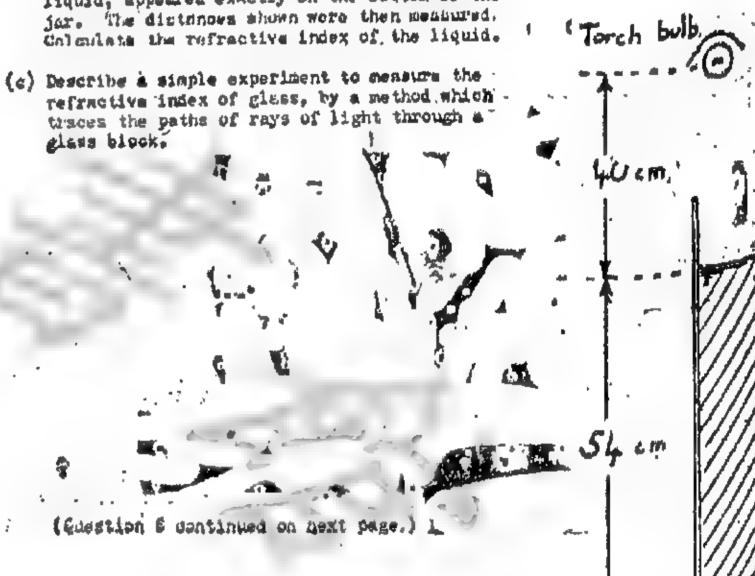

Experiment 2. 300 gm. of atom chips at 20°C are placed in the sapty flack find cooling it again to 20°C. Stead at 100°C is passed through the and 20 gm. of water collected at the end of the experiment, the specific heat of the stone chips.

Experiment 5. The Clask is again emptied and cooled to 20°C. A got, of ice at placed in it, and steam at 100 C inmediately passed through time 27.77 gm. of water are found in the flask at the the experiment. Calculate ? experiment. Calculate X. (Latent heat of fusion of ice . 80 cal./gm.)

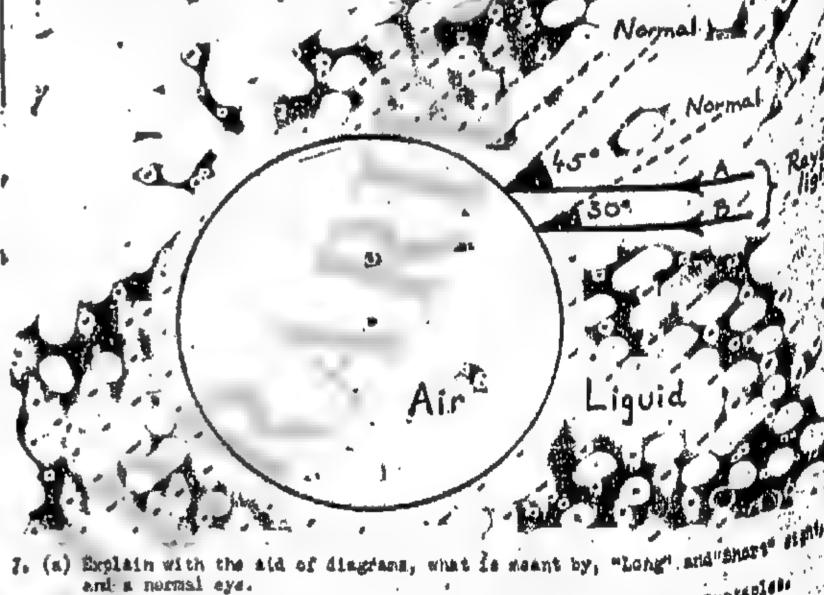

Observers

6. (a) Say what you know about the image seen in a plane mirror. (b) In the apparatus shown, the position of the

lighted toroh bulb was adjusted until its image, seen by reflection in the surface of the liquid, appeared exactly on the buttom of the jar. The distances shown were then measured. Coloniate the refractive index of the liquid.

6. (4) The diagram below shows a spherical air bubble in a liquid which has angle = 45°. Redraw the diagram showing the complete paths of fair All angles shown in your disgram should be calculated accurately and older labelled.

Show how thehe derests are corrected by the use of suitable spectables (b) An object placed 50 on. from a lens forms a reduced upright image of

(1) the focal length of the lens (2) the height of the image, if the object is 16 cm. higher) name the type of lens.

from the lane. Find by accurate scale drawing to

State the spale used in your diagram.

(a) Describe briefly a pinhole camera. State what it demonstrates and ful two-reasons why it is unsuitable for taking photographs.

(a) Describe an experiment to find the frequency of an unmarked tuning fork of known a mired someter, one suitable weight, and one tuning fork of known p (Question & bontinued on next pige)

6. (b) When a card is held against the edge of a rotating wheel with equally on it. a supplied note to rotating wheel with equally on it, a musical note is produced. Why?

(c) How does the speed of rotation affect this musical note? (d) If the wheel has 20 teath and rotates at 1500 revolutions per minutes

abte produced by the card causes the air column in a nearby gas in the strongly with its lowers possible frequency. Calculate the length of column, neglecting and corrections, if the velocity of sound in (e) Briefly explain, with the aid of suitable diagrams, the difference wave and a longitudinal

9. (a) Explain with the aid of a carefully labelled dragram, now an electric be used to permanently magnetise a steel rod so that the left hand becames the North Pole. becomes the Morth Pole. (b) Explain what is meant by "Polarisation", and say how it affects the

(c) Explain how polarisation has been overcome in the Laclanche celli-

(d) Celculate the working life of a Leolanohe cell used to supply a party of 0.2 maps, if the zinc electrode has a mass of 20.4 gm. and it may the sinc is all consumed before any other component. (Electro-chemical-equivalent of zine = 0.00034 gm./coulomb/

10. (a) Define the "Volt", in terms of the heating effect of a purrent. Define the "Watt".

.b) A projector lamp is lacelled; "1000 watts, 200 volts." What does this menn? What is the resistant along this menn? What is the resistance of the lamp? (a) Explain, with the aid of a circuit diagram, how you could use a just in

an memeter, to test the accuracy of the statement written on the (6) The LAMP in question b. is connected in turn into two different circuits as shown, below, so that its power is now reduced to 100 watts in both cases. Calculate the values of A. and E. 200 Volts

(11) choosing a career: (1)

accommodation does a family have in these estates?

Time Allowed - 21 hours

Index No......

Total Marks = 200 SECTION A

Answer ALL questions in this section in the spaces provided. Chemical symbols and formulae must not be used instead of passes. In calculations all working must be shown.

1. Give the chemical names of the following substances: Slaked line Washing soda__ Li tharage White vitriol 2. State two uses of shloring and two of sulphur.

Chlorine. (i)_ * *

3. Sodium is a metal. Give two of its physical properties and two of its chemical properties in support of this statement. Physical . (i)___

Give two feasons why we regard air as a mixture and not a compound, .

hention briefly four visible changes which occur when a small piece of acdium is dropped on to cold water.

(115) (SV) The equation is

6. Name two sulphates and two chlorides that are insoluble, or only slightly soluble, in cold water. . - . Sulphates (1)____ Chlorides (s) (ii)

7. How is water gas made?_____ Of what gases is it composed?

White 'T' in the bracket if you consider the statement true and 'P' if you consider it to be false. (Marks will be deducted for incorrect answers). Ammonium nitrite is a stable compound-

The atmosphere contains more argon than carbon dioxide. } All bases turn litmus blue. Sulphur dioxide bleaches by reduction.) Carbon dickide is a poisonous gas.

Why is it usually prepared together with producer gas?_____

Atoms cannot be created or destroyed.__ Complete these definitions. The valency of an element is

The law of Constant Composition states A saturated solution of a solute

An atom is

10. State the colours of the precipitates formed when hydrogen salphide is passed } through aqueous solutions of .

Lead ni trate Zinc sulphate_ 11. A white deliquescent solid dissolved readily in water to form a colourless neutral / solution. Name the solid.

Copper aulphate_

neasures for the safety and welfare of adult workers are required by That further points are compulsory where women are employed. What A white powder is either the carbonate, sulphate or sulphite of sodium. Its aqueous solution reacted with barium chioride solution to form a white precipitate, which dissolved in dilute hydrochloric acid. The powder is therefore either sodium

Sulphur dioxide

12. Calculate the volume of Normal sulphuric acid which can be prepared from 250 c.c. of ,1.28 Normal acid.

Portance is the island of Lan Teo in the life of the Colony? all opposite are taking place there? Describe any further ways in which you 15. If the valency of an element M is 2 and its equivalent is 42, write the formulae of its nitrate and bicarbonate and calculate the percentage of oxygen in its oxide. Basy on the work of a District Officer in the New Territories, and show In administration have taken place in the last few years.

14. - Name & gas that' (1) burns in oxygen but not in air

(11) turns scidified potassium permangamente solution colourless and forms no precipitate (111) turns soidified potassium permanganate

solution colourless and forms a precipitate) (iv) liberates bromins from potassium bromids aclution (v) turns ferrous sulphate solution brown

Write chemical equations to show the action of heat on the following and is asset case name all the products formed. Zing carbonater

Equation ___ Equation bicarbonate Anhydrous farrous Products sulphate

On the left is a list of types of chemical reaction. On the right ere pairs of substances that react together. In the space provided write the letter or litters which describe the obemical reaction between each pair of aubstances. The first : ore is done for you.

Magnesium and oxygen A. Oxidation Hydrochloric wold and silver nitrate B. Combustion Carbon and mitric acid

C. Combination Hydrogen sulphide and lead acetate Sodium and chlorine

D. Double Decomposition E. Raversible : reaction Tron and Steam ... E. Displacement Zinc and copper sulphate

17. Sketch below the snapes of the solutility curves of sodium, chloride, and of potassium nitrate with water as a selvent. -

and the properties. SECTION B (120 Marks)

Ammonia and hydrogen chloride

Attent any FOUR questions in this section. Each question carries 10 marks.

1. (a) Draw and label the apparatus you would use to prepare dry sulphur diexide, . . starting from 'copper and sulphuric acid.

Write the equation-

(b) Describe fully how you would obtain copper sulphate crystals from the mixture --- left in the reaction vessel at the end of the preparation of the sulphur diskidef (c) 0.6 gm. of a metal dissolved in a dilute soid and liberated 265 e.c. of hydrogen at 16° C. and 750 mm. pressure.

Calculate (1) the weight of the gas, and (11) the equivalent of the metal (1 litre of dry hydrogen at R.T.P. weighs 0.09 gm.)

Give, for each of the following pairs of substances, ONE CHEMICAL test by which you would distinguish them. State the results of each test on both substances to which it is applied. Give a confirmatory test for any gas evelved as part of such a teste

(a) Calcium oxide and calcium corbonate. (b) Potessium nitrate and potessium chloride. (c) Kanganase dioxide and ferrous sulphide. (d) Sodium chloride and ammonium chloride. . (e) Aluminium mitrate and lead mitrate.

Diagrams are not required. Equations are essential:

3. (a) Describe, with a lauslied diagram, how you would prepare and collect restorably

(b) How would you show that producer gas contains carton monoxide?

(c) State briefly four differences between the properties of dismond and those of

(d) A besker contains Normal sodium carbonate solution

Describe fully how to transfer 25 c.c. of this solution to a conical flask, 'using a pipatte. State all the precautions necessary to ensure accuracy

Describe how you would show by experiment the presence of

(a) oxygen in hitric acid A (b) copper in copper nitrate (c) nitrogen in emenia -

d) carbon in calcium carbonate. . (e) chloring in potassium chlorate,

state the law.

5. (a) Draw a labelled diagram of the apparatus you would use to remove carbon dioxide. oxygen and water vapour from a sample of gir and to collect the dry gas;

(b) Explain the meanings of the terms normal salt, acid salt, deliquescence and efflorescence. Give one example of each term.

(c): A solution containing 10 gm. of lead hitrate is mixed with a solution containing " 10 ga. of sodium chloride. Calculate the weight of lead chloride formed. Which of the reactants is in excess and by how much? (Atomic weights: N 16; 'O 16; 'Na 23, C1 35.5, Pb 207)

(b) Three oxides of ni trogen contain 46.7%. 50.4% and 36.6% of ni trogen. Show by

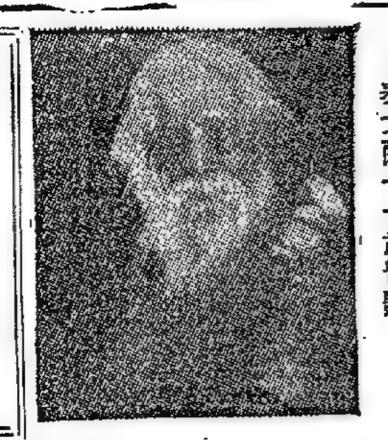

calculation that these figures are in accordance with a chemical law . Name and

6. Describe, giving all necessary experimental details, how you would prepare (1) potessium mitrate from potessium hydroxide solution and (iii) lead sulphate starting from lead nitrate solution.

Percentage of oxygen
